## Evergreen Trees

In this department our stock is thrifty and fiberously rooted, having been several times transplanted. Failure to frequently transplant results in a coarse root system; an evergreen so grown, regardless of how symmetrical and attractive the top may be, is almost certain to fail to grow when planted by the purchaser. Our prices include lifting the plants with a ball of earth and sewing it in burlap as an extra precaution that the plant may arrive in the best of condition.

All evergreens will be balled and burlapped at the following prices.
